# Availability of the indicators proposed by the UN Statistical Commission (204 indicators)

# SDGs a major challenge for public administration

- Institutionally (integrated approach)
  - Interconnectedness of the international and domestic agenda (vertical)
  - New connection between (sustainable) development and climate change
  - Policy coherence for SD (horizontal)
- New quality of partnerships with civil society and business
- Political leadership

## Key steps in SDGs implementation

### **Step 1: Ensure political leadership**

Report on SDGs submitted jointly by the PM and the FAM to the government/Parliament

### **Step 2: Encourage partnerships and awareness-raising**

Participatory process of choosing and interpreting priority targets

### **Step 3: Create national platform for implementation**

Including the targets in the national SDS

### **Step 4: Set-up a framework for monitoring**

Choosing national indicators (policy-relevant, comparable)

## Conclusion

- Don't lose the **momentum** (EYD 2015/EYD 2017?)
- Deal with **institutional challenges** (national, EU, global level)
- Strengthen central government **coordination capacity**
- Coordinate **EU action**
- Focusing on **Europe 2020** revision is a good move
- Make use of **all capacities available** (OECD's work on Green Growth, Well-Being or PCD)
